## **INQUIRY CHECK LIST FOR COUPLING CAPACITOR VOLTAGE TRANSFORMER**

---

( ) Items marked with brackets: Minimum information given with inquiry.

- (1.) Voltage Level (Nominal or Maximum)
- (2.) Insulation level or BIL
- (3.) Frequency
- (4.) Rated primary voltage and rated secondary voltage or rated primary voltage and marked ratio
- (5.) Number of secondary windings and if tapped.
- (6.) Accuracy class and burden each winding.
7. Capacitance if specific value required.
8. Transient response if specific value required.
9. Ambient temperature range if other than -50°C to +50°C
10. Altitude if above 1000 m
11. Site conditions if other than “normally polluted:
12. Minimum creepage distance
13. Thermal burden in case there is a specific requirement.
14. Over voltage factor.
15. Any additional requirements, e.g. terminal clamps, conduit hubs, special test requirements.
- (16) Quantity
17. Delivery date required.
